- ii. email - grha6668@colorado.edu

#### 4. Application Name

- a. Room Mate

#### 5. Application Description

- a. Room Mate is a dating app style application in which students of participating colleges will be able to find and match with potential roommates. Using user-entered data, we will be able to match students to a compatible roommates based on personality metrics.
- b. Once the students are matched, they will be provided with each other's contact information to talk further, and provide to their school which will complete the assignment of the dorm rooms.

#### 6. Vision Statement

- a. **Room Mate:** "Easing the process for the average college student in search of a compatible roommate."

#### 7. Version Control

- a. <https://github.com/grace-harrell/14-02-csci3308>

#### 8. Development Methodology

- a. a

#### 9. Communication Plan

- a. Communication will be primarily on discord.
- b. Contact info for the team members can be found in

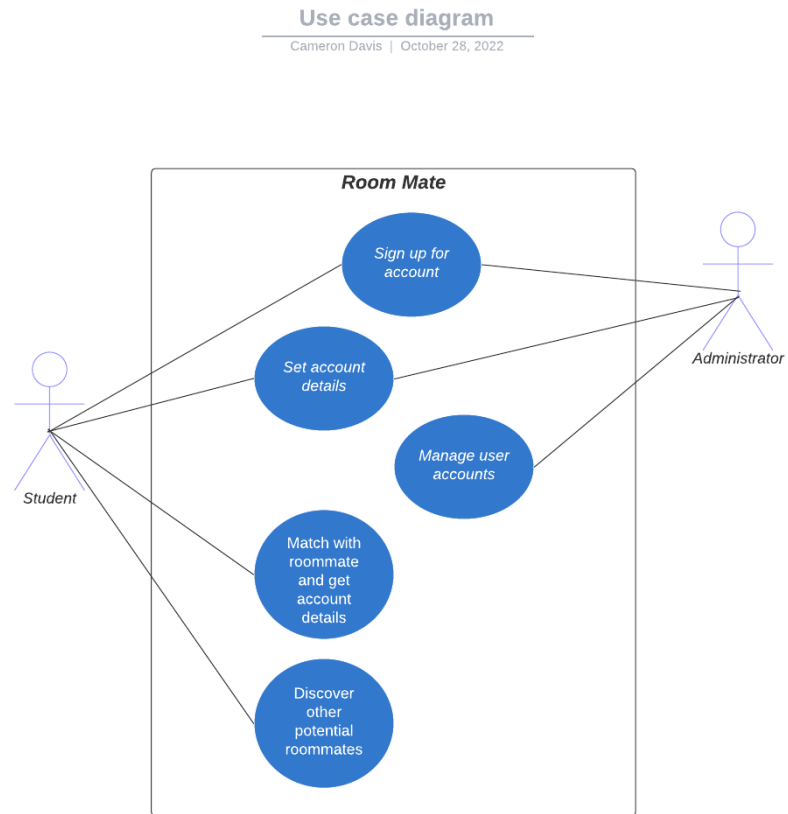

#### Team Info

#### 10. Meeting Plan

- a. Tuesdays/Thursdays are the best meeting days
- b. 4pm every Monday brief meeting
- c. The first meeting will be on Nov 4th @ 9am

## 11. Use Case Diagram

### a. Diagram
